## nal von minden

### Your partner in professional diagnostics

#### We help you care!

For more than 35 years, our company has been characterised by innovative products and an outstanding service. Through intensive exchange with our customers, we have optimised our portfolio for you and adapted it to current developments in the healthcare and drug market. We strive to stay the most innovative company in the industry and remain your first contact for all questions concerning drug screen rapid tests. We don't just want to satisfy you, we want to inspire you.

We have a presence throughout Germany, with more than 5 locations, as well as all over Europe, with several subsidiaries and an extensive network of customer service advisers and field representatives.

#### Quality Assurance

We understand our responsibility as a manufacturer of *in-vitro* diagnostics. For this reason, the quality of our products and customer service is of utmost importance. Our quality management system has been EN ISO 13485 and ISO 9001 certified since 2003, and is reviewed by TÜV Rheinland on a yearly basis. Internal audits, an extensive process map and a corrective-and-preventative system help us to maintain the highest standards.

Our products, in line with European IVD-directives, are CE certified and have proven their capabilities on the market over many years. We take part in proficiency tests regularly and with great success.

## Your specialist for *in-vitro* diagnostics

We consistently use our capabilities, our knowledge and our 35-year-experience to widen and refine our portfolio and processes. Our contact with you, the customer, and your suggestions are critical in achieving this. In co-operation with you, we can find innovative solutions to meet your requirements. As your longstanding partner, we want to be the best – not just to satisfy your needs, but to inspire you too.

Our current portfolio includes rapid tests in the areas of paediatrics, gynaecology, urology, infectious diseases, bacteriology, oncology and drugs. For the latter we also offer specific ELISA and HEIA tests. Furthermore we can provide toxicology laboratory diagnostics through our partner laboratories as well as POCT devices that bring the laboratory to your practice.

**Our catalogues, brochures and flyers are available in thirteen languages:** German, English, French, Spanish, Italian, Polish, Dutch, Czech, Finnish, Portuguese, Swedish, Danish and Russian. **Further information on our wide product range can be found at [www.nal-vonminden.com](http://www.nal-vonminden.com), or you can contact us directly at [info@nal-vonminden.com](mailto:info@nal-vonminden.com).**

We bring you fascinating articles on current topics, detailed background information and news from the world of diagnostics, as well as brief updates from the company.

# Rapid drug tests

## Point-of-care tests for every need

Whether for use in prosecution or rehabilitation, rapid drug tests represent an invaluable aid for medical, social and penal authorities in the modern age. As the drug market continues to evolve and become more innovative, so too must the tools with which we can lend our support to all those affected by it. nal von minden offers a wide range of tests for the detection of drugs or their consumption in urine, saliva, blood (serum, plasma) or

– in the case of alcohol – in breath. More than 35 different parameters , as well as 7 different adulteration parameters, can be detected using our Drug-Screen urine rapid tests. These products are available in dip, cassette and cup format to suit your requirements. We also offer substance tests for the detection of unknown powders, tablets and liquids. Please find further details regarding our products in this catalogue.

# nal von minden Drug-Screen® Rapid Tests

## Test structure and principle

# Design layout and interpretation

## Urine rapid tests

More accurate, more effective and more tamper-proof than ever! The nal von minden Drug-Screen® urine rapid tests are a cost-effective aid in the detection of drugs, medication and their metabolites in urine samples. Tests determine the presence of illegal and adulteration substances, offering quick and reliable results within 5 to 8 minutes. Our tests boast up to 99 percent agreement with the gold standard GC-MS method. To meet your needs, we offer our urine rapid tests in three formats: dip, cassette and cup tests.

### Advantages

- ✓ Simple and hygienic test procedure
- ✓ Fast and reliable results
- ✓ Flexible cut-off options for varying needs
- ✓ Variety of multi-test combinations for the simultaneous detection of multiple parameters

### For use in

- ✓ Detox and rehabilitation
- ✓ Emergencies
- ✓ Forensics
- ✓ Workplace testing
- ✓ Transport authorities and custom controls

## Urine multi-tests

Time is money! To save you both, nal von minden Drug-Screen® dip and cassette tests are also available as multi-tests. These urine tests allow for the detection of multiple drugs and adulteration parameters simultaneously.

In accordance with your needs and requirements, we can customise tests. A list of our most common combinations can be found in the table on the following page.

### Advantages

- ✓ Easy to use and reliable results in minutes
- ✓ Only a small sample (as little as 3 drops) required to perform the tests
- ✓ More than 35 different parameters available
- ✓ For a certain minimum order quantity, tests can be customised to your specific needs

# Urine multi-cassette tests

## nal von minden Drug-Screen® Multi-2 Cassette Tests

Product code*	Product	Parameters
104156	Multi 2TD	THC150, THC25
104024	Multi 2TF	EDDP100, MOR/OPI300
104025	Multi 2TG	BZD300, MOR/OPI300
104026	Multi 2TH	MET1000, THC50

## nal von minden Drug-Screen® Multi-3 Cassette Tests

Product code*	Product	Parameters
623002	Multi 3T	BZD300, COC300, MOR/OPI300
104032	Multi 3TC	BAR300, BZD300, TCA1000
104033	Multi 3TD	COC300, MOR/OPI300, THC50
104037	Multi 3TG	THC50, THC150, THC25
104038	Multi 3TH	BUP10, EDDP100, MTD300
104039	Multi 3TJ	BZD300, EDDP100, MOR/OPI300
104130	Multi 3TK	BUP10, BZD300, MOR/OPI300
104131	Multi 3TL	BZD300, MOR/OPI300, THC50
104134	Multi 3TP	OXY100, TML100, ZOL50
104233	Multi 3TZ	AMP1000, MET1000, THC50

## nal von minden Drug-Screen® Multi-4 Cassette Tests

Product code*	Product	Parameters
630302	Multi 4T	BZD300, COC300, MOR/OPI300, THC50
104044	Multi 4TA	BZD300, COC300, MOR/OPI300, MTD300
104045	Multi 4TB	COC300, MET1000, MOR/OPI300, THC50
104042	Multi 4TC	COC300, MDMA500, MOR/OPI300, THC50
104040	Multi 4TD	AMP1000, COC300, MOR/OPI300, THC50
104046	Multi 4TF	COC300, MOR/OPI300, MTD300, THC50
104043	Multi 4TK	COC300, MOR/OPI2000, SPC50, THC500

## nal von minden Drug-Screen® Multi-5 Cassette Tests

Product code*	Product	Parameters
640002	Multi 5T	AMP300, COC300, MET300, MOR/OPI300, THC50
104252	Multi 5TAA	BAR300, BZD300, MTD300, PCP25, PPX300
104257	Multi 5TAF	AMP1000, COC300, MOR/OPI300, MTD300, THC50
104151	Multi 5TB	BZD300, COC300, MOR/OPI300, MTD300, THC50
104152	Multi 5TC	AMP1000, BZD300, COC300, EDDP100, MOR/OPI300
104050	Multi 5TD	AMP1000, COC300, MET1000, MOR/OPI300, THC50
104054	Multi 5TH	AMP1000, BZD300, COC300, MOR/OPI300, THC50
104052	Multi 5TL	AMP1000, COC300, MDMA500, MOR/OPI300, THC50
104166	Multi 5TX	AMP300, BZD300, MET500, MOR/OPI2000, THC50
104251	Multi 5TZ	COC300, MDMA500, MTD300, MOR/OPI300, THC50

**nal von minden Drug-Screen® Multi-6 Cassette Tests**

Product code*	Product	Parameters
640302	Multi 6T	AMP300, BZD300, COC300, EDDP100, MOR/OPI300, THC50
104060	Multi 6TA	AMP1000, BZD300, COC300, MOR/OPI300, MTD300, THC50
640802	Multi 6TB	AMP300, BUP10, BZD300, COC300, MOR/OPI300, THC50
104061	Multi 6TC	AMP1000, COC300, MDMA500, MET1000, MOR/OPI300, THC50
104062	Multi 6TD	AMP1000, BZD300, COC300, MET1000, MOR/OPI300, THC50
104065	Multi 6TG	AMP1000, BZD300, COC300, MDMA500, MOR/OPI300, THC50
104160	Multi 6TL	AMP1000, BUP10, BZD300, EDDP100, MET1000, MOR/OPI300
104164	Multi 6TR	AMP300, COC100, MDMA500, MET300, MOR/OPI100, THC25
104167	Multi 6TT	AMP500, COC300, MDMA500, MET500, MOR/OPI300, THC50
104262	Multi 6TY	AMP1000, BZD300, COC300, MOR/OPI300, THC50, THC150

**nal von minden Drug-Screen® Multi-7 Cassette Tests**

Product code*	Product	Parameters
104070	Multi 7TA	AMP1000, BUP10, BZD300, COC300, MOR/OPI300, MTD300, THC50
104071	Multi 7TB	AMP1000, BAR300, BZD300, COC300, MOR/OPI300, MTD300, THC50
104072	Multi 7TC	AMP1000, BZD300, COC300, MET1000, MOR/OPI300, MTD300, THC50
104075	Multi 7TF	AMP500, COC300, MDMA500, MET500, MOR/OPI300, MTD300, THC50
104078	Multi 7TJ	AMP1000, BZD200, COC300, MDMA500, MET1000, MOR/OPI300, THC50
104170	Multi 7TK	AMP1000, BUP10, BZD300, COC300, EDDP100, MOR/OPI300, THC50
104079	Multi 7TL	AMP1000, BUP10, COC300, MET1000, MOR/OPI300, MTD300, THC50
104171	Multi 7TM	AMP300, BUP10, BZD100, COC100, EDDP100, MOR/OPI300, THC25
104172	Multi 7TN	AMP300, BAR300, BZD100, COC100, MDMA500, MOR/OPI100, THC25
104175	Multi 7TR	AMP500, BZD300, COC300, EDDP100, MET500, MOR/OPI300, THC150

**nal von minden Drug-Screen® Multi-8 Cassette Tests**

Product code*	Product	Parameters
104082	Multi 8TC	AMP1000, BAR300, BZD300, COC300, MET1000, MOR/OPI300, MTD300, THC50
104084	Multi 8TD	AMP1000, BAR300, BUP10, COC300, MDMA500, MOR/OPI300, MTD300, THC50
104085	Multi 8TE	AMP1000, BAR300, BZD300, COC300, MDMA500, MOR/OPI300, MTD300, THC50
104086	Multi 8TF	AMP1000, BUP10, BZD300, COC300, EDDP100, MOR/OPI300, TCA1000, THC50
104087	Multi 8TG	AMP1000, BUP10, BZD300, COC300, MDMA500, MOR/OPI300, MTD300, THC50
104183	Multi 8TO	AMP1000, BUP10, COC300, MDMA500, MET1000, MOR/OPI300, MTD300, THC50
104184	Multi 8TP	AMP1000, BZD200, COC300, KET1000, MDMA500, MET1000, MOR/OPI300, THC50
104185	Multi 8TQ	AMP300, COC300, EDDP100, MDMA500, MET300, MOR/OPI300, MTD300, THC50

**nal von minden Drug-Screen® Multi-9 Cassette Tests**

Product code*	Product	Parameters
104091	Multi 9TB	AMP1000, BAR300, BZD300, COC300, MDMA500, MOR/OPI300, MTD300, TCA1000, THC50
104092	Multi 9TC	AMP500, BUP10, COC300, MDMA500, MET500, MOR/OPI300, MTD300, THC50; PH/CREA
104095	Multi 9TF	AMP1000, BZD300, COC300, EDDP100, MDMA500, MET1000, MTD300, MOR/OPI300, THC50
104097	Multi 9TH	AMP1000, BUP10, BZD300, COC300, EtG500, KET1000, MTD300, MOR/OPI300, THC50

**nal von minden Drug-Screen® Multi-10 Cassette Tests**

Product code*	Product	Parameters
104100	Multi 10TC	AMP1000, BAR300, BZD300, COC300, MET1000, MOR/OPI300, MTD300, PCP25, TCA1000, THC50
104101	Multi 10TD	AMP1000, BAR300, BZD300, COC300, MDMA500, MET1000, MOR/OPI300, MTD300, TCA1000, THC50
104117	Multi 10TI	AMP1000, BUP10, BZD300, COC300, EDDP100, MDMA500, MET1000, MOR/OPI300, TCA1000, THC50

## Urine cup tests

Hygienic, practical and available with various parameter combinations: The nal von minden Drug-Screen® urine cup tests with integrated test strips are the ideal option for drug screening. The chances of coming into contact with the sample is greatly reduced, making cup tests the most hygienic method of sample collection. The cup can also be used as a transport container to

send the sample directly to a laboratory for confirmatory analysis. With our innovative Cup II (Key Cup) test, the sample is held separately from the testing strips so analysis can be started at your convenience. For the early detection of manipulation attempts, each cup test is fitted with an integrated temperature strip to measure sample freshness.

### Advantages

- ✓ Simple test procedure with fast, reliable results
- ✓ Reduced risk of coming into contact with sample material
- ✓ Flexible cut-off levels for differing needs
- ✓ Flexible multi-test combination for the detection of several parameters simultaneously
- ✓ Sample collection container and rapid test in one

# Key Cups – simple, safe and advanced

## Cup II

- ✓ Separated sample and test chambers
- ✓ Turn key to begin test run whenever and wherever you're ready
- ✓ Suitable for use with the RSS II, III and flash scanners (connection to LIMS is possible)
- ✓ Available as two-sided version, allowing for nearly every parameter combination (for evaluation using RSS III only)

Product code*	Product	Parameters
<b>3 Parameter</b>		
910030	Drug-Screen Cup II 3A-AC-C	EtG500, MET1000, THC50; PH/CREA/SG

\*25 cup tests per pack. Alternative and custom test combinations available.

## Adulteration tests

Very few people are smarter than a drug test. Nevertheless, many attempt to manipulate them. The adulteration methods range from drinking a considerable amount of water before giving the urine sample – the purpose being to dilute it – to the addition of foreign substances intended to eliminate the drugs or metabolites present in the sample. Unfortunately for them, an adulteration test used in the run up to a drug screening can indicate whether the sample has been manipulated, as well as which method was used.

# Safeguarding reliable results

To guarantee they are as tamper-proof as possible, all nal von minden Drug-Screen® rapid tests are equipped with a whole variety of adulteration indicators. First of all, a control line (C line) is integrated into each test strip to monitor test performance. This confirms that an adequate sample volume has been used and that nothing was added to the sample which may interfere with the test principle in general. Equally important is the quality of the sample material. Different methods are often used to manipulate the outcome of drug tests, with the intention of avoiding a positive result. The dilution of urine samples through the addition of extra fluids is a common method.

Testing the temperature of a fresh urine sample can be a fast and clear indicator of the authenticity of the sample. For this reason, you will find temperature strips integrated into every nal von minden Drug-Screen® Cup test. These test strips can also be used in conjunction with other test formats for extra peace of mind. For the

reliable detection of substances in a manipulated sample, all nal von minden multi-parameter urine tests (cup, dip, cassette) can be equipped with adulteration strips. These strips are able to quickly identify whether a sample has been tampered with through the measurement of the parameters listed in the table below.

The nal von minden UrineCheck 7 DoA Adulteration Test allows for the detection of up to 7 adulteration parameters simultaneously, aiding in the identification of manipulation attempts.

Product	Parameter
pH-value	For the detection of added acids or solutions
Nitrite	Nitrate is metabolised to nitrite by gram-negative bacteria – this may alter the test result
Specific weight	For the detection of sample dilution
Creatinine	For the detection of both <i>in-vitro</i> and <i>in-vivo</i> dilution
Glutaraldehyde	Glutaraldehyde is found in some disinfectants and can have an influence on the outcome of the test
Bleaching agents	Bleaching agents can interfere with results as a result of impairing the test and control line
Pyridinium chlorochromate	A chemical that can interfere with the test

## nal von minden adulteration parameters

Test strips for the detection of urine adulteration

Product code	Product	Parameter	Pack Size
630925	UrineCheck 7 DoA Adulteration Test	7 parameter: Creatinine, pH-value, glutaraldehyde, specific weight, nitrite, bleaching agents and pyridinium chlorochromate	25 strips
124004	Temperature Strips	32°C-37°C	100 strips

Are you interested in further adulteration tests? Need help for chain of custody?

## Whole blood tests

As reliable as it gets: The nal von minden Drug-Screen® whole blood tests deliver fast and accurate results regarding substance misuse. Using serum and plasma, as well as venous whole blood and capillary blood, drug consumption is detectable within minutes. Sensitive cut-off levels also aid the earlier detection of acute drug consumption.

### Advantages

- ✓ Samples cannot be adulterated
- ✓ Substances detectable within minutes of consumption
- ✓ Fingertip testing possible
- ✓ Specifically designed cut-off levels

### For use

- ✓ By emergency doctors
- ✓ On comatose patients
- ✓ In the detection of acute intoxication
- ✓ During initial testing in post-mortem examinations

# Whole blood rapid tests

## Saliva tests

Minimally invasive, tamper-proof and highly effective: The collection of oral fluids doesn't require any special facilities. It allows for witnessed sampling, all the while maintaining the subject's dignity. Therefore, saliva tests are particularly popular for roadside and workplace testing on the one hand and drug screenings in prisons and rehabilitation services on the other. Saliva tests offer an earlier detection window than urine tests, enabling the detection of recent consumption as opposed to consumption over a longer time period.

### Advantages

- ✓ Accurate results in just 10 minutes
- ✓ Easy handling and interpretation
- ✓ Simple sample collection using swab
- ✓ Long shelf life, storage at room temperature
- ✓ No electronic equipment necessary
- ✓ High sensitivity and specificity

### For use in

- ✓ Addiction management treatment
- ✓ Detoxification treatment
- ✓ Emergencies
- ✓ Forensics
- ✓ Workplace testing
- ✓ Transport authorities and custom controls

## Saliva Test Classic

In accordance with the wishes and suggestions of our customers, we are constantly evolving – and with us our products. The nal von minden Drug-Screen® Saliva Classic Test has also been revised and can now offer the following features in addition to 4 new parameters:

- ✓ Methylenedioxypyrovalerone (MDPV, 50 ng/ml)
- ✓ Methylenedioxymphetamine (MDA, 50 ng/ml)
- ✓ Fentanyl (FYL, 10 ng/ml)
- ✓ Zolpidem (ZOL, 25 ng/ml)

### Improvements

- ✓ Integrated volume indicator – shows when sufficient saliva (1 mL) has been collected
- ✓ Screw-on cap has replaced snap lid – for safer and more practical shipping for confirmatory analysis
- ✓ Larger sample collection volume – new swab holds 1 mL
- ✓ Larger drop volume – facilitates application of sample to test
- ✓ More comfortable sampling – thanks to improved taste and appearance of the new, softer sponge
- ✓ More customised parameter combinations possible – your needs are important to us

New parameters,  
improved test!

# Saliva Test Advanced

With this innovative saliva test, a hygienic test procedure is guaranteed. The Saliva Test Advanced simultaneously analyses cocaine, cannabis, methamphetamine, morphine and amphetamine.

For this reason, it is particularly suitable for use in police checks – carried out in a single step, a positive result means the test can be sealed and sent to a laboratory for confirmatory analysis. The laboratory is then able to extract a sample from the test without having to reopen the sealed lid.

## Advantages

- ✓ Comfortable 1-step test, no additional materials necessary
- ✓ Accurate results in 10 minutes
- ✓ Simple sample collection using swab
- ✓ Long shelf life, storage at room temperature
- ✓ No electronic equipment necessary
- ✓ High sensitivity and specificity due to specially developed antibodies

## nal von minden Drug-Screen® Multi-5 Saliva Test Advanced

Product code*	Product	Parameters
116050	Multi 5A	AMP50, COC20, MET50, MOR/OPI40, THC12

\*10 tests per pack.

# Saliva Cup

Proven test principle, new test format: Hygienic, minimally invasive and tamper-proof-testing for alcohol and drug abuse has never been easier. However, this test format was only available for urine samples – until

now. The new saliva cup now makes it easy to take test samples using a sponge that can be securely sealed inside a cup. Nearly 20 different parameters can be reliably interpreted this way.

## Advantages

- ✓ Optimised test procedure requiring only 2 steps, no pipetting necessary
- ✓ Integrated volume indicator shows when sufficient saliva sample has been collected
- ✓ Flat result field for quick and easy documentation
- ✓ The snap-in function of the screw cap guarantees that the sample swab is squeezed out completely
- ✓ Evaluation with RSS flash possible
- ✓ Individual combination of up to 16 of 20 parameters possible

## nal von minden Drug-Screen® Multi-5 Saliva Cup

Product code*	Product	Parameters	
117050	Multi 5BA Saliva Cup	AMP50, COC20, MET50, MOR/OPI40, THC12	Coming soon!

\*5 cup tests per pack. Alternative and custom test combinations possible.

NEW

## Saliva Test Integrated

The Saliva Test Integrated, carried out in just two steps, testing for up to six parameters simultaneously. The eight parameters – amphetamine, benzodiazepine, cocaine, cannabis, methamphetamine, methadone, opiates and PCP – are available in various combinations.

In the event of a positive result, the Saliva Test Integrated can also be sealed and sent to a laboratory for confirmatory analysis of the original sample.

The only difference between the Advanced and Integrated saliva tests is that the Integrated Saliva Test swab must be disposed of after use. The laboratory can access the sample through the stopper on the front of the device.

- ✓ No extra step involving adding extracted sample drops necessary
- ✓ Accurate results in only 9 minutes
- ✓ Simple sample collection with swab
- ✓ Long shelf life, storage at room temperature
- ✓ No electronic equipment necessary
- ✓ High sensitivity and specificity

### nal von minden Drug-Screen® Multi-5

## Reader systems

The nal von minden Rapid Slide Scanner (RSS) series offers you the optimal tool for the easy, fast and objective interpretation of nearly all nal von minden rapid tests, most of which are barcodeed to facilitate scanning with our RSS systems. The universal device can analyse drug tests as well as medical assays in all kinds of lateral flow test formats. Its powerful SMART software ensures a fast analysis and the complete documentation of test results. The test recognition algorithm dispenses with the need for multiple specific test trays for each test. The SMART package comes with a built-in database which allows for unlimited data storage. It is compatible with tablets – using the RSS in conjunction with mobile devices brings objective and precise results to the palm of your hand.

### Your choice:

- ✓ Drug-Screen Single-Dip/Cassette test
- ✓ Drug-Screen Multi-Dip/Cassette test
- ✓ Drug-Screen Urine Cup II
- ✓ NADAL® Medical rapid tests
- ✓ Adulteration parameters
- ✓ Different matrices: urine, saliva, whole blood/serum/plasma

## Rapid Slide Scanner (RSS) III

Test, interpret, document: Due to flexible test positioning capabilities and intelligent test recognition software, almost all nal von minden rapid tests can be analysed and interpreted with the RSS III. Amongst a wide variety of test formats for both drug and medi-

cal testing, tests in cup format can now also be easily positioned and evaluated. nal von minden also offers a tool for the automatic recognition of barcoded tests, making the Rapid Slide Scanner systems even easier to use. That's drug screening 2.0!

### Advantages

- ✓ Easy to use
- ✓ Free positioning of the test
- ✓ Easy and objective evaluation in seconds
- ✓ Automatic recognition of barcoded tests
- ✓ Software in multiple languages
- ✓ Evaluation of up to 12 parameters simultaneously
- ✓ Individual result reports

- ✓ Individual customer support
- ✓ Barcode scanner (handheld; optional) for patient data entry
- ✓ Connection to LIMS (optional)
- ✓ Data export via Microsoft-Excel™ or CSV (optional)
- ✓ Data import via CSV (optional)
- ✓ Remote support and update with internet connection

# Blood Borne Viruses

Intravenous drug use has been identified as a high risk behaviour  
for the transmission of HIV and hepatitis

## Did you know...

...early HIV diagnosis and treatment can reduce infection rates by up to 95%

...90% of people with acute hepatitis B recover fully

...up to 80% of those infected with hepatitis C don't know they have it

## Benefits of point-of-care testing for blood borne viruses include:

- ✓ Results in minutes
- ✓ Reduced waiting anxiety
- ✓ Reduced lab costs
- ✓ Earlier treatment intervention
- ✓ Earlier transmission awareness
- ✓ Venous or fingerstick blood sampling possible

For more info on our medical rapid tests and  
POCT-systems download the NADAL® brochure here:  
<http://bit.ly/nvm-downloads-en>

Ask us about our  
blood borne virus  
tests today!

## RSS flash

Introducing a mobile, handheld, diagnostic device which delivers objective and precise results in a flash. This robust, lightweight reader is portable and can be used anywhere. It provides clear and easy-to-read results in just 10 seconds, regardless of lighting conditions. You

can reliably interpret results of cup, dip and cassette tests. The visualisation and documentation of the results is taken to a whole new level with instant data capture using our innovative and intuitive software.

### **Advantages:**

- ✓ Robust, handheld, portable and cable-free
- ✓ Versatile: for use with Drug-Screen and medical tests in dip, cup and cassette format
- ✓ Premium high-tech smart device with unlimited storage
- ✓ Highly accurate evaluation in seconds
- ✓ Test interpretation using RSS III Reader software

Product code	Product	Description
770070	RSS flash	Mobile analyser, USB cable, power cable, multifunctional device, user handbook, software download link

770079	Upgrade kit	Cup adapter, single
770074	Bluetooth printer	RSS flash Thermal printer 5.6 cm
770077	Bluetooth printer	RSS flash Thermal printer 8 cm

## Laboratory Analysis

Our nal von minden Drug-Screen® products are intended for preliminary screening. In situations that may have legal implications or serious medical consequences, it is common practice to perform further laboratory analysis. Here, gas chromatography-mass-spectrometry (GC-MS) or liquid chromatography-massspectrometry (LC-MS) are the preferred confirmatory methods. Should you require a laboratory analysis, we will be happy to arrange it for you.

### How it works:

1. You order an analysis with us online, by telephone or by fax.
2. We promptly send you a sample collection kit containing all the information and material needed for sending the sample to the laboratory.
3. After collecting the sample in accordance with the instructions included in the kit, seal it in the pre-addressed envelope provided and send it to the laboratory.
4. Your results will be available within approximately 14 days. For an express analysis, this is reduced to 5 working days. Where a confirmatory analysis must be carried out, this process can be slightly longer.
5. The prepared report is shipped (solely to the declared address).

# Laboratory Analysis

## Laboratory Hair Analysis

The consumption of drugs and medication can be detected through hair analysis gives a much larger detection window than is the case with blood or urine. The consumed substances and their by-products are embedded in hair roots and prevail for a significant time as part of the hair matrix. The precise time frame is dependent on hair length. With an average growth rate of around 1 cm per month, a 12 cm-long hair sample should hold a year's worth of information regarding consumption.

The detection of chronic or excessive alcohol abuse is detectable in hair through the determination of the direct alcohol marker ethylglucuronide (EtG). Just as with drugs and medication, a 1 cm-long sample can indicate alcohol consumption over a one month period. However, the detection of alcohol consumption in hair is recommended over a 3 month period. Therefore, 2 samples must be taken for an analysis over a 6 month time period, and 4 samples for an entire year.

Parameter	Concentration ng/ml
COC	0.1
AMP	0.1
MOR/OPI	0.1
BZD	0.05
THC	0.02
EtG	>7

## Laboratory Urine Analysis

Do you have a dubious test result? In such cases, it can be useful to reanalyse the sample with an immunological test, or use other methods such as GC-MS to identify and quantify analytes.

Parameter	Concentration ng/ml
AMP	50
BZD	50
COC	30
THC	10
EtG	30
MTD+EDDP	50
MOR/OPI	25

## Laboratory Saliva Analysis

Saliva analysis is an alternative or additional method of forensic drug testing, and is becoming increasingly popular. It remains the most simple and least invasive method of sample collection, therefore making it easier to supervise. The detection of substances in saliva is possible for up to 3 days. When exceeding the following concentrations (see adjacent table), saliva samples will yield a positive result.

Parameter	Concentration ng/ml
AMP	50
BZD	10
COC	20
THC	4
MTD	50
MOR/OPI	40

## Drug detection in substances and traces

Police, customs officials and prison staff, as well as treatment and addiction centres are playing a game of cat mouse against the black drug market on a daily basis. To keep the upper hand, authorities and social workers need to know which drug they are dealing with – and furthermore if a particular substance really is illegal in the first place. For this reason, we offer both nal von minden substance tests and the Tracedetect range for the highly specific and sensitive detection of substances. Both test methods are safe and easy to use and offer fast and reliable results. Our substance tests are based on chemical detection methods and are able to pick up intoxicants in unknown substances such as powder, tablets and fluid. Our tracedetect tests are based on an immunological detection method (the lock-key principle) and enable the specific detection of each substance with especially high sensitivity. In the field of forensics they can aid in the detection of barely visible trace substances on steering wheels, door handles, tabletops and other surfaces.

# ESA Substance Tests

## For the identification of substances by colour change

Police and customs officials often come across suspicious substances , the composition of which is unknown. Our substance tests can examine and identify powder, tablets and liquids by chemical test principle. The handy, one-step test delivers quick and simple reliable results in just a few seconds.

ESA Test GmbH has long been known for its ampoule tests, which enable the detection and identification of drugs. Made in Germany to the highest quality standards, we deliver consistent and reliable products and services.

### Advantages

- ✓ Chemical test principle
- ✓ Easy and safe single-step assay
- ✓ Fast results in just one minute
- ✓ Clear colour indication for easy interpretation
- ✓ Broad range of substances detectable

# Tracedetect Substance tests

## For the highly-sensitive detection of substance traces

In the case of a drug offence, it can often be useful to investigate the surrounding environment as well as the suspected person. The detection of substances on various surfaces can be a useful tool in aiding investigations. Chemical substance tests require visible amounts of the suspicious substance and allow only a very limited classification of their identity. The nal von minden Drug-Screen® Tracedetect tests are based on the immunologi-

cal detection method, thus following the lock-key principle. Compared to the conventional ampoule tests, the nal von minden Drug-Screen® Tracedetect tests facilitate the particularly sensitive detection of drugs of abuse with high accuracy. They can even easily detect residues on surfaces, including non-visible traces.

### Advantages

- ✓ Ability to confirm ESA test results
- ✓ Exceptionally high sensitivity, including the possible detection of invisible drug traces
- ✓ Sophisticated pocket-sized format
- ✓ Safe and simple to use
- ✓ Supplied with sample collectors for all sample collection methods and incubation bag for harsh weather conditions
- ✓ Fast and reliable results in just 1 minute

Product code*	Product

## Alcohol tests

Alcohol is the most omnipresent drug there is, and therefore one of the most dangerous. We can often ingest alcohol unknowingly by eating sweets, using cosmetic products or even taking medicine. With the nal von minden Drug-Screen® Alcohol-Screen rapid tests you can detect alcohol in saliva and urine simply and safely. Blood alcohol content can be estimated through saliva, due to a strong correlation between saliva and alcohol concentrations in blood. Alcohol in urine is an indirect measurement for the assessment of blood alcohol content. Nevertheless, the most popular way to test for alcohol is via breath. Whatever test format best suits your needs – as the following pages show, you have a variety of high-quality products to choose from.

#### Rapid test: Urine

Description	Cut-off	Product code	Pack size
EtG Individual test strips	500 ng/ml	101062	50
EtG Individual cassettes	500 ng/ml	102062	30

#### Alcohol rapid test: Saliva or Urine

## Dräger 3000

The Dräger Alcotest 3000 is sensitive, fast and offers intuitive operation: simply turn on, blow, and read the results. A combination of automated sample collection and accurate measuring sequences with quick reaction times allows for reliable and precise readings at the press of a button. The device is ergonomic and robust, hygienic to use and suitable for both left and right-handed individuals.

#### Description

Dräger 3000	300010
Hygienically-packed mouthpieces (100 pieces)	300100
Calibration Service	300200

## AlcoQuant 6020

This innovative alcohol breathalyser signals a new level of security. The electrochemical sensor only picks up alcohol specifically and, with short measuring intervals and waiting times, allows for several tests to be carried out consecutively. The AlcoQuant 6020 is approved by police services throughout the world.

#### Description

AlcoQuant 6020	360011
Calibration Service	300200

# Do you hate waste as much as we do?

## Then short shelf life tests could be ideal for you!

At nal von minden, stock levels are planned to ensure excellent choice and availability for our customers without accumulating unsold products. However, despite best efforts, sometimes we have surplus stock.

When our tests are nearing their expiry date, they are categorised as short shelf life (SSL) products and made available to our customers at a **discounted rate**. Depending on the test, SSL products may still have up to 10 months shelf life remaining.

### How does it work?

Register your interest in SSL tests with us to receive notifications when tests meeting your criteria become available.

- I am only interested in SSL products that exactly match my usual test format and parameters
- I am interested in SSL substitutions

(A different test format or additional parameter)

I am interested in tests with the following names/parameters:

Name: \_\_\_\_\_

Company: \_\_\_\_\_

Address: \_\_\_\_\_

E-mail: \_\_\_\_\_

Phone: \_\_\_\_\_

I would like to be informed by:

- E-mail
- Telephone

Alternatively, you can enquire about the availability of SSL products when placing your order with us.

## Quality management and service

It is our aim to establish ourselves as the most reliable business partner in the field. For this reason, excellent customer service and engagement are the cornerstones of our company philosophy. As your long-term partner, we offer a comprehensive service from the first consultation through to product delivery and beyond. We will work together with you to find individual solutions. We don't just want to satisfy your needs, we want to inspire you.

### Quality assurance

Our quality management system has been EN ISO 13485 and ISO 9001-certified since 2003, and is reviewed by TÜV Rheinland on a yearly basis. Internal audits, an extensive process map and a corrective-and-preventative system help us to maintain the highest standards.

### Proficiency testing

We take part in proficiency tests regularly and with great success. Our experience has been documented in a small information brochure, available on request.

# Our range of services

## Consultation

Our team, which includes highly trained medical product consultants, is always available. Competent and knowledgeable consultation is a cornerstone of our services - whether by phone, through our homepage or via a face-to-face meeting with one of our field consultants.

## Delivery

### Rapid tests

For orders received before 1pm GMT, delivery to the UK is 2-3 working days and 3 days to Ireland. Should you wish to order a custom test combination, please allow up to 10 weeks for manufacture and delivery.

### Laboratory reagents

For goods that we have in stock, the delivery time takes 2-3 days. For laboratory tests that are not in stock, the delivery time is 5-10 days.

## Enquiries and Orders

### Ordering through our online shop

Tests can also easily be ordered through our webpage. Simply place your required tests in the basket and send an enquiry along with your contact details. You will then be sent an email with your username and password for your next visit to our online shop.

### Ordering by phone or fax:

Our team are available for you on the following numbers:

Tel: +49 941 290 10-0

Fax: +49 941 290 10-50

### Ordering by email:

To order by email, please contact us on  
[info@nal-vonminden.com](mailto:info@nal-vonminden.com)

## Benefits of registering

Signing up to our online shop gives you the opportunity to save your previously bought products as a basis for future orders. Following your first order we would be happy to activate your account. This allows you to send us your product list for a quote or order using your previous prices.

## Guarantee

### Quality and service

Our Quality management System is certified according to DIN EN ISO 9001 and DIN EN ISO 13485. We can therefore always guarantee 100% service and that work will be undertaken at the highest level of professionalism.

### External Quality Management

### Data Protection

Your personal data will not be passed on to any third parties, but is kept solely for internal use by nal von minden.
